SUMMARY

QA Automation Engineer with nearly three years of experience testing a mission-critical system in Unit 8200. Built a Cypress framework supporting 200+ E2E tests and integrated automated regression testing into GitLab CI/CD. Mentored engineering teams through weekly automation workshops.

EXPERIENCE

QA & Automation Engineer Nov 2023 - Jul 2026

Unit 8200, Israel Defense Forces

- Built a Cypress automation framework from scratch using the Page Object Model and reusable custom commands; developed more than 200 end-to-end tests.
- Integrated automated regression suites and test reporting into GitLab CI/CD pipelines.
- Designed and executed UI, API, integration, regression, and performance tests; used exploratory testing to identify edge cases and usability issues.
- Worked with developers and product managers on acceptance criteria, release planning, defect investigation, and production readiness.
- Developed internal automation tools and used Claude to support testing and quality-related tasks.
- Mentored new software engineering teams and delivered weekly automation workshops on testing practices.

TECHNICAL SKILLS

Programming: JavaScript, TypeScript
Automation and API testing: Cypress, Playwright, Jest, Postman, REST APIs
CI/CD and version control: Git, GitLab CI/CD, Jenkins
Databases: MongoDB, Redis | **Cloud storage:** Amazon S3
Tools: Jira, Confluence, Catalyst DevOps | **AI tools:** Claude

EDUCATION

Bamas Course | Israel Defense Forces 2023
Software testing methodologies, automation frameworks, and CI/CD.

Handasaim Herzliya High School 2020 - 2023
Computer Science, App Programming, Physics

LANGUAGES

Hebrew (native) | English (fluent)
